Subject: request for EPA network connectivity

1. This turned out to be an erroneous request. ISP has been monitoring the network and IT situation with our forward staff in Durango multiple times a day, and we've known all along that speed was fine. Dave was not aware of this, and he also had no knowledge of the status of the forward teams. He was a little embarrassed but I encouraged him to contact us directly for future requests.

2. We are turning up all the ports in their fourth floor conference room momentarily. We had to rewire a closet first to make this happen.
